

Patent Leather

We have worked hard over the years to find a supplier that consistently produces a high quality patent finish. We recommend the veg tanned for items that require a finished edge and more firmness. The chrome tanned is softer and bends easier, however, the edges are more difficult to finish. This is a hard-to-find specialty item and high quality is important to your project's end results. These leathers are in-stock and ready to ship. TR selection is sold per square foot.
